

Toddlers edible sensory play balls!

Simply mix up the jelly according to the pack's instructions and add it to your [ice ball moulds](#). (If the weather is very warm or you have your heating on I'd recommend using a little less water than the packet says, so the balls will hold their shape better in the heat.) Use [ice ball moulds](#) in two different sizes to add variety to the sensory activity.

Once the jelly is set simply empty the [ice ball moulds](#) out on to a large tray and let the sensory play begin. You'll love how kids of all ages won't be able to resist getting really hands on with these edible sensory play balls!

This is an activity that truly stimulates all the senses! The smells and colours are just gorgeous and then there's the taste of course, and the textures as they roll it and squish it around. And don't forget about the sound too! Just listen to the wonderful squelches and slurps etc.
